Region Editor

Objective

You will need to use a modeless tool window on the midterm exam so adding one to the Region editor project will be a good experience. There needs to be a menu item that invokes the tool window and only one window should be visible at any given time. If the window is closed with the close button in its title bar then clicking on the menu should create another. This tool needs to allow the user to add new regions to the editor.

The Tool Window
